Environmental Impact Statement (EIS)

Project Information

Name Covenant Christian Church		
Description of Proposed Project Proposing improvements to existing site including; 5 foot walk, 1,489 sq. ft. addition, 458 sq. ft. portico, pavilion, hammerhead access, accessible elevator, 12 parking spaces, screened fence/wall		
Proposed Use(s)		
Residential	Non-Residential	Mixed-Use
<input checked="" type="checkbox"/> Single Family Residential	<input type="checkbox"/> Commercial/Office	<input type="checkbox"/> Describe uses:
<input type="checkbox"/> Multiple Family Residential	<input type="checkbox"/> Industrial	
	<input type="checkbox"/> Institutional/Public/Quasi-Public	

Purpose. The purpose of the EIS is to:

- A. Provide relevant information to the City Planning Commission and the City Council on the environmental impact of applications for rezoning, platting, site condominium, and site plan approval and other actions that will have a significant effect on the environment
- B. Inject into the developer's planning process consideration of the characteristics of the land and the interests of the community at large, as well as the developer's own interests and those of potential customers
- C. Facilitate participation of the citizenry in the review of community developments
- D. Provide guidelines for standards as required by *Section 138-2.204* of the [zoning ordinance](#)

Content. The Environmental Analysis Report (Part I and II), the Impact Factors (Part III), and the Summary (Part IV), which together form the EIS, should meet all of the following requirements:

- A. The EIS is intended to relate to the following:
 - 1. Ecological effects, both positive and negative
 - 2. Population results
 - 3. How the project affects the residential, commercial, and industrial needs
 - 4. Aesthetic and psychological considerations
 - 5. Efforts made to prevent the loss of special features of natural, scenic or historic interest
 - 6. Overall economic effect on the City
 - 7. Compatibility with neighborhood, City and regional development, and the Master Land Use Plan
- B. The EIS must reflect upon the short-term effect as well as the long-term effect upon the human environment:
 - 1. All pertinent statements must reflect both effects
 - 2. All pertinent statements must suggest an anticipated timetable of such effects
- C. On developments of 5 acres or more, a topographic presentation indicating slopes 12% and more, depressions, major drainage patterns, wooded areas, flood plains, and wetlands is required

Questions or Clarifications. Please contact the Department of Planning and Economic Development at the contact information above for questions or clarifications.

Guidelines

These guidelines are to be followed by developers desiring to gain approval of proposed plans. The guidelines provide for an in-depth analysis of the site in question considering the past, the present, the proposed plan, and the future expectations with respect to community environmental sanity. The analysis is intended to determine how the proposed plan will meet goals of the community as they are set out separately in the Master Land Use Plan.

The complexity of the EIS must clearly depend upon the scope of the project and the magnitude (in the opinion of the Planning Commission) of the potential impact. It is not the intention of the City to create an unduly burdensome or expensive requirement for the developer. In preparing the EIS in accordance with the outline below, judgment should be exercised to keep the form and extent of responses in proportion to the scope of the project. Each answer is to be as brief as practical.

Where questions or answers are not applicable, please state "Not Applicable". All other data is required, and where incomplete or in adequate data is provided based on the scope of the project and the opinion of the Planning Commission, the lack of such data shall be cause for tabling the application by a majority vote of the body present. The matter will be reopened upon submission of a written report on any questions not properly detailed.

Part 1. Analysis Report: Past and Present Status of the Land

<p>A. What are the characteristics of the land, waters, plant & animal life present?</p> <p>1. Comment on the suitability of the soils for the intended use</p> <p style="text-align: center;">Soils are 10B; Marlette sandy loam and 11B; Capac sandy loam</p> <p>2. Describe the vegetation giving specific locations of specimens of 6" diameter or greater, or areas of unusual interest on parcels of 5 acres or more</p> <p style="text-align: center;">See tree list on siteplan</p> <p>3. Describe the ground water supply & proposed use</p> <p style="text-align: center;">No use of ground water</p> <p>4. Give the location & extent of wetlands & floodplain</p> <p style="text-align: center;">No floodplains or wetlands exist onsite</p> <p>5. Identify watersheds & drainage patterns</p> <p style="text-align: center;">Per siteplan, surface drainage flows towards retention pond</p>
<p>B. Is there any historical or cultural value to the land?</p> <p>Land contains no historical or cultural value</p>
<p>C. Are there any man-made structures on the parcel(s)?</p> <p>Existing parking, garage, and Church building</p>

D. Are there important scenic features? Existing trees which are all to remain
E. What access to the property is available at this time? Drive apron at southwest of site from Hamlin Road
F. What utilities are available? Sanitary, water, telephone, gas, electric

Part 2. The Plan

A. Residential <i>(Skip to B. below if residential uses are not proposed)</i>
1. Type(s) of unit(s)
2. Number of units by type
3. Marketing format, i.e., rental, sale or condominium
4. Projected price range
B. Non-Residential/Mixed-Use <i>(Skip to Part 3. Impact Factors if non-residential/mixed-uses are not proposed)</i>
1. Anticipated number of employees 10
2. Hours of operation/number of shifts Sun -Tue 9am-1pm, Thur-Fri 9am-1pm, Wed 7:30-9pm
3. Operational schedule <i>(continuous, seasonal, seasonal peaks, etc.)</i> continuous
4. Description of outside operations or storage Recreational pavilion, detached garage storage

5. Delineation of trade area	N/A
6. Competing establishments within the trade area (<i>document sources</i>)	N/A
7. Projected growth (physical expansion or change in employees)	N/A

Part 3. Impact Factors

A. What are the natural & urban characteristics of the plan?	trees to remain, existing building, existing parking
1. Total number of acres of undisturbed land	2.95 acres undisturbed
2. Number of acres of wetland or water existing	0.309 acres of retention pond
3. Number of acres of water to be added	0 acres
4. Number of acres of private open space	0 acres
5. Number of acres of public open space	4.11 acres
6. Extent of off-site drainage	drainage to be contained onsite
7. List of any community facilities included in the plan	proposed pavilion
8. How will utilities be provided?	addition to be serviced by utilities in existing building
B. Current planning status	preliminary
C. Projected timetable for the proposed project	8 months
D. Describe or map the plan's special adaptation to the geography	see plan for elevations
E. Relation to surrounding development or areas	Residential neighborhood east, neighboring church north, dental office west

F. Does the project have a regional impact? Of what extent & nature? No
G. Describe anticipated adverse effects during construction & what measures will be taken to minimize the impact Soil erosion and sediment control will be necessary. The pond and all areas of construction will be surrounded by silt fencing
H. List any possible pollutants sediment, petroleum, fertilizer, garbage
I. What adverse or beneficial changes must inevitably result from the proposed development? 1. Physical a. Air quality no change b. Water effects (<i>pollution, sedimentation, absorption, flow, flooding</i>) no change c. Wildlife habitat (<i>where applicable</i>) no change d. Vegetative cover increased impervious area from improvements means less vegetation e. Night light 2 proposed lamp posts 2. Social a. Visual Improved parking, new pavilion, new portico b. Traffic (<i>type/amount of traffic generated by the project</i>) no change c. Modes of transportation (<i>automotive, bicycle, pedestrian, public</i>) accessible by automotive, bicycle, and by foot d. Accessibility of residents to recreation, schools, libraries, shopping, employment & health facilities no change

3. Economic

- a. Influence on surrounding land values

increased value of property

- b. Growth inducement potential

overall beautification supports Rochester Hills growth

- c. Off-site costs of public improvements

none

- d. Proposed tax revenues (*assessed valuation*)

non-profit

- e. Availability or provisions for utilities

no change

- J. In relation to land immediately surrounding the proposed development, what has been done to avoid disrupting existing uses & intended future uses as shown on the Master Land Use Plan?

Proposed improvements and associated activity will not disturb uses of neighboring properties

- K. What specific steps are planned to revitalize the disturbed or replace the removed vegetative cover?

Landscaping, reseeded/resodding, and grading are planned post construction

- L. What beautification steps are built into the development?

new addition and recreational pavilion accompanied by landscaping

- M. What alternative plans are offered?

none

Environmental Impact Statement (EIS)

Part 4. The Summary

Based on the foregoing Analysis Report, state the net environmental impact on the City of Rochester Hills if the proposed plan is implemented. The summary is intended to briefly set forth a basis for the City of Rochester Hills Planning Commission and the City Council to determine the acceptability of proposed development.

It is suggested that the summary be brief and to the point. Make the comments relative to the initial impression and the lasting effect upon the entire community in relation to at least these points of concern:

1. Ecological effects
2. Residential, commercial or industrial needs
3. Treatment of special features of natural, scenic or historic interest
4. Economic effect
5. Compatibility with neighborhood, City and regional development, and the City's Master Land Use Plan

If proper soil erosion control measures are taken, there will be no environmental impact from these improvements. The addition will be serviced by all necessary utilities to service patrons' and employees' needs. During construction, surface drainage shall be contained with silt fencing around construction activity and the existing retention pond. All trees shall be preserved. Elevations of land will be restored and improved post construction in order to direct surface drainage appropriately. These improvements will attract more guests to the Church and Rochester Hills resulting in a positive economic effect. The proposed improvements will add several new aesthetically pleasing features that guests and neighboring properties will enjoy.
