Hi Kristen,

Dr. Ghanem asked me to provide you the following requested information for our property on Auburn and Donley:

We will need a minimum of 30 parking spaces for our office. We will have 10 exam rooms and 4 testing rooms. For one of our tests, patients will stay for up to 3 hours each (so for one of the testing rooms we would require 3 parking spaces just for that room of testing for the day)

So during our business hours we expect to have a minimum of 16 patient cars per hour (that doesn't account for patients that have their significant others meet them at our office to join them for their appointment) and we will need parking for 15 staff.

Please feel free to call me with any questions.

Rose-Marie Prasatek MIS, RN
