# **Environmental Impact** Statement (EIS)

Tames 1		£
Dra	inat	Information

Project Information				
Name Detroit Chinese	Alliance Church North			
Description of Proposed Project		•		
Parking lot expansion				
		010		
		15-33-128-605		
Proposed Use(s)				
Residential	Non-Residential	Mixed-Use		
☐ Single Family Residential	☐ Commercial/Office	Describe uses:		
☐ Multiple Family Residential	☐ Industrial	for church activities		
	☐ Institutional/Public/Quasi-Public			
Purpose. The purpose of the EIS is to:				
A. Provide relevant information to the City Planning Commission and the City Council on the environmental impact of applications for				

- rezoning, platting, site condominium, and site plan approval and other actions that will have a significant effect on the environment
- Inject into the developer's planning process consideration of the characteristics of the land and the interests of the community at large, as well as the developer's own interests and those of potential customers
- Facilitate participation of the citizenry in the review of community developments
- D. Provide guidelines for standards as required by Section 138-2.204 of the zoning ordinance

Content. The Environmental Analysis Report (Part I and II), the Impact Factors (Part III), and the Summary (Part IV), which together form the EIS, should meet all of the following requirements:

- The EIS is intended to relate to the following:
  - Ecological effects, both positive and negative
  - Population results
  - How the project affects the residential, commercial, and industrial needs
  - Aesthetic and psychological considerations
  - Efforts made to prevent the loss of special features of natural, scenic or historic interest
  - Overall economic effect on the City
  - Compatibility with neighborhood, City and regional development, and the Master Land Use Plan
- The EIS must reflect upon the short-term effect as well as the long-term effect upon the human environment:
  - 1. All pertinent statements must reflect both effects
  - 2. All pertinent statements must suggest an anticipated timetable of such effects
- On developments of 5 acres or more, a topographic presentation indicating slopes 12% and more, depressions, major drainage patterns, wooded areas, flood plains, and wetlands is required

# Environmental Impact Statement (EIS)

#### Guidelines

These guidelines are to be followed by developers desiring to gain approval of proposed plans. The guidelines provide for an in-depth analysis of the site in question considering the past, the present, the proposed plan, and the future expectations with respect to community environmental sanity. The analysis is intended to determine how the proposed plan will meet goals of the community as they are set out separately in the Master Land Use Plan.

The complexity of the EIS must clearly depend upon the scope of the project and the magnitude (in the opinion of the Planning Commission) of the potential impact. It is not the intention of the City to create an unduly burdensome or expensive requirement for the developer. In preparing the EIS in accordance with the outline below, judgment should be exercised to keep the form and extent of responses in proportion to the scope of the project. Each answer is to be as brief as practical.

Where questions or answers are not applicable, please state "Not Applicable". All other data is required, and where incomplete or in adequate data is provided based on the scope of the project and the opinion of the Planning Commission, the lack of such data shall be cause for tabling the application by a majority vote of the body present. The matter will be reopened upon submission of a written report on any questions not properly detailed.

#### Part 1. Analysis Report: Past and Present Status of the Land

- A. What are the characteristics of the land, waters, plant & animal life present?
- 1. Comment on the suitability of the soils for the intended use

It has been used as a church. We will turn some grass area into parking lots.

2. Describe the vegetation giving specific locations of specimens of 6" diameter or greater, or areas of unusual interest on parcels of 5 acres or more

There are two big trees. But the project will not touch these two trees.

3. Describe the ground water supply & proposed use

#### N/A

No.

4. Give the location & extent of wetlands & floodplain

No wetland.

5. Identify watersheds & drainage patterns

There is a existing drainage pond. We will add a small drainage pond in the front area.

B. Is there any historical or cultural value to the land?

C. Are there any man-made structures on the parcel(s)?

Church building and a parsonage.

	f
D. Are there important scenic features?	l
No.	
E. What access to the property is available at this time?	
Paved roads.	
F. What utilities are available?	
City water, electricity, and gas.	
only water, electricity, and gac.	
	İ
Part 2. The Plan	
A. Residential (Skip to B. below if residential uses are not proposed)	
1. Type(s) of unit(s)	
1. Type(s) of diff(s)	
	1
2. Number of units by type	
3. Marketing format, i.e., rental, sale or condominium	
4. Projected price range	
B. Non-Residential/Mixed-Use (Skip to Part 3. Impact Factors if non-residential/mixed-uses are not proposed)	
Anticipated number of employees	1
Church have two employees, one full-time & one part-time	
Church have two employees, one full-time & one part-time	
2. Hours of operation/number of shifts  Several activities each week, with each activity lasting 2-3 hours.	ion a
2. Hours of operation/number of shifts Satom deu: 10 mm ~	4Pm
Several activities each week, with each activity lasting 2-3 hours.	<u> </u>
Friday-6:30 pm ~ 10:00 pm; Sunday - 9:30 am - 1:30 pm.	
3. Operational schedule (continuous, seasonal, seasonal peaks, etc.)	1.
continuous.	
t in the second	
	-
4. Description of outside operations or storage	
Picnic activities on grass. No storage.	

5.	Delineation of trade area				
N/A	4				
6,	Competing establishments within the trade area (document sources)				
-					
<u> </u>					
7.	Projected growth (physical expansion or change in employees)				
<b>D</b>	1.2 January Castova				
A.	t 3. Impact Factors  What are the natural & urban characteristics of the plan?				
۸.	What are the natural & dipart characteristics of the plants				
1.	Total number of acres of undisturbed land				
_	0 Number of acres of wetland or water existing				
2.	0				
3.	Number of acres of water to be added				
	O Nove have a favore of policies and a page				
4.	Number of acres of private open space				
5.	Number of acres of public open space				
6.	0 Extent of off-site drainage				
0.					
	No				
7.	List of any community facilities included in the plan				
' '					
	N/A				
8.	How will utilities be provided?				
١٨١٥	We will use existing utilities.				
0 40	will doc existing durines.				
В.	Current planning status				
l					
VVE	e submitted the expansion plan for approval by the city.				
C.	Projected timetable for the proposed project				
Pla	an to finish it by the end of year 2019				
D.	Describe or map the plan's special adaptation to the geography				
E.	Relation to surrounding development or areas				
1					

F. Does the project have a regional impact? Of what extent & nature?
F. Does the project have a regional impact? Of what extent & nature?  No
G. Describe anticipated adverse effects during construction & what measures will be taken to minimize the impact
It will not impact the neighboring communities.
H. List any possible pollutants
None.
What adverse or beneficial changes must inevitable result from the proposed development?     Physical
a. Air quality
None
b. Water effects (pollution, sedimentation, absorption, flow, flooding)
None
c. Wildlife habitat (where applicable)
None
d Vogatativa agyar
d. Vegetative cover  None
NOTIC
e. Night light
There will be parking lot light poles.
2 Social
<ul><li>2. Social</li><li>a. Visual</li></ul>
Some grass land becomes parking lots.
b. Traffic (type/amount of traffic generated by the project)
It is very small project. I think it will generate small amount traffic during the two weeks of construction.
c. Modes of transportation (automotive, bicycle, pedestrian, public)
Automotive
d. Accessibility of residents to recreation, schools, libraries, shopping, employment & health facilities
N/A

3. a.	Economic Influence on surrounding land values				
It will increase land values a little bit.					
b.	. Growth inducement potential				
c.	Off-site costs of public improvements				
d.	Proposed tax revenues (assessed valuation)				
е.	Availability or provisions for utilities				
j,	In relation to land immediately surrounding the proposed development, what has been done to avoid disrupting existing uses & intended future uses as shown on the Master Land Use Plan?				
K.	What specific steps are planned to revitalize the disturbed or replace the removed vegetative cover?	1			
N/					
L.	L. What beautification steps are built into the development?				
Landscape plan.					
M.	What alternative plans are offered?				
		_			

## Environmental Impact Statement (EIS)

#### Part 4. The Summary

Based on the foregoing Analysis Report, state the net environmental impact on the City of Rochester Hills if the proposed plan is implemented. The summary is intended to briefly set forth a basis for the City of Rochester Hills Planning Commission and the City Council to determine the acceptability of proposed development.

It is suggested that the summary be brief and to the point. Make the comments relative to the initial impression and the lasting effect upon the entire community in relation to at least these points of concern:

- 1. Ecological effects
- 2. Residential, commercial or industrial needs
- 3. Treatment of special features of natural, scenic or historic interest
- 4. Economic effect
- 5. Compatibility with neighborhood, City and regional development, and the City's Master Land Use Plan

The proposed parking lot expansion project will not have any ecological effects.

In our parking lot plan submitted to the city of Rochester Hills, we have taken steps to ensure our neighbors will not be disturbed. We are hiring the professional companies to do the landscape plan for our church property & photometric plan for the lighting of the parking lot. Our goal with this plan is to mitigate the impact of lighting on our neighbors, and create a landscape that will be attractive, pleasing and enhance the overall beauty of our neighborhood. We are going to plant the trees along the south side fence of the drainage pond and along the north side at the front of Church, and extend the wood fence on the east side of our church, and plant the trees along the north side at the front of Church.

We believe that the project indeed will contribute to the beauty, safety and privacy of our neighboring community. It will also help to increase the property value in the area.
