

Legislative File No: 2018-0300

TO:	Mayor and	City Council	Members

FROM: Kevin Krajewski, Interim Director of MIS

DATE: August 13, 2018

SUBJECT: Blanket Purchase Order: Annual Support & Maintenance for Asset Management System

REQUEST:

City Council is requested to authorize a blanket purchase order in the amount not-to-exceed \$55,000.00 through September 30, 2019 for Annual Support & Maintenance for the City's Asset Management Software to Lucity, Inc., Overland Park, KS.

REASON FOR PURCHASE:

- 84 Users in 8 Departments (Accounting, Building, DPS-Engineering, DPS-Garage, Facilities, MIS, Parks/Forestry, and Planning)
- In the last 12 months:
 - o 21,900 work orders created
 - o 3,200 work request/complaints created
 - 43,000 tasks have been completed
 - o 135,300 employee hours have been recorded in work orders
- The request portion is used for internal requests that are used to generate work orders for Facilities or DPS Garage requests. It is also used for external complaints.
- Residents use a web based system to create requests to bring City issues to our attention. This
 system allows us to track progress, and then communicate the results of those requests to the
 residents.
- On the work order side, Lucity is used to track any work that is done on a City asset. Examples are
 water, sanitary sewer, storm sewer, roads, buildings, HVAC, computers, monitors, and software.
 Departments like DPS, Facilities, and Building are using work orders to track all of their time. This
 allows these Departments to easily create reports showing man hours for generalized work types
 down to very detailed task reports for budgeting and performance indicators.
- All of the work order information about an asset along with any inspection information is shown on the asset side of Lucity. This would include any preventive maintenance that is done such as water valve exercising or hydrant flushing. This information can then be used for planning of future repairs or replacement of that asset.
- Lucity has replaced other software including Tree Manager in Forestry and Tokay cross connection software in Building.

Lucity ties into our GIS mapping. Work request and work order locations can be mapped in GIS along
with asset condition information. With the relationship of Lucity and GIS, MIS and DPS can easily
create maps that show our City assets with their condition, last inspection date or work history.

The Annual Support & Maintenance purchase includes the following for the period of 10/1/2018 through 9/30/2019:

- 4 seats Sewer
- 4 seats Street & Roads
- 2 seats Traffic Signs
- 1 seat Street Lights
- 2 seats Rights-of-Way
- 1 site license Water
- 4 seats Storm

PROCESS:

Vendor Name and Address:

Lucity, Inc. 10561 Barkley Street, Suite 500 Overland Park, KS 66212
