Below are responses to the reviewed site plan dated 07.13.2022.

**Planning**

---

- Added legal description to AS1.0.

**Building**

---

- Updated plans to coordinate with current building permit construction documents.
- FDC location omitted per Mark Artinian e-mail noting FDC location is not necessary.

*Per Josh Boyce of the RH Fire Department (FD), the existing FDC shown on the Site Plan Review and building permit documents on the north side of the building does not exist at that location. There is an existing FDC(s) in other locations and you do not have to identify any of them on either your Site Plan Review or building permit documents. The FD knows where the existing FDC(s) are and they are comfortable with their locations*

**Engineering**

---

- Added keynote for contractor to set fence at location that puts existing gate valve outside fenced area.
