## DESCRIPTION

Steel Hex Web Deer Fence is recommended for those experiencing high deer pressure and want a secure, chew-proof barrier for a garden, residential property or commercial land. This steel fence can also serve as a fence for dogs that like to chew and dig. Built to last, this fence combines the aesthetically pleasing hexagonal openings with a UV-resistant PVC coating to protect the steel wire from harsh weather conditions. Combining this fencing with a monofilament tension line makes a stable, strong barrier against deer and rodents including rabbits, squirrels and gophers.

What makes Steel Hex Web Fencing THE right choice?

Chew-Resistant

1" openings keep all but the smallest pests away

20 - 30 yr. life span

Nearly invisible after 20'

Steel Hex Web is simple enough for anyone to install without the help of a professional. This fence is an incredible alternative to more costly and complicated fence systems. Installation with our no-m and UV treated heavy duty ties is simple enough for anyone. Once installed, this a...  
no maintenance.

Customer Reviews

The UV-resistant coating makes this fencing material incredibly durable, and will remain tough even after years of harsh weather. The black color makes this fence virtually invisible from as close as 20 feet.

**Excellent!**  
Just as I expected! I needed an 8 foot enclosure for my peacocks and this fencing was perfect for sides and top! Thank you! Great quality. Easy to work with or so my handyman says!
