

## PURPOSE OF THE PLAN

In order to address congestion issues in the City, the plan will identify strategies like:

- Traffic improvements
- Traffic signal technologies
- Street and intersection redesign options
- Nonmotorized improvements

Key corridors in the City will be highlighted in the plan where safety for all users will be emphasized (pedestrians, bicyclists, and vehicles).

## WHAT IS A TRANSPORTATION MASTER PLAN?

*A Transportation Master Plan is a review of the entire transportation system, including vehicles, pedestrians, safety, and congestion. The plan will provide recommendations for accomodating future growth and trends.*

## PROCESS AND TIMELINE

The Transportation Master Plan will take approximately 12 months to complete, with an anticipated end date of September 2020. A public workshop will be held this summer where you'll have the opportunity to weigh in on draft recommendations. More information on the workshop will be released later in the spring - so stay tuned!
