Bud and Jeff: I have attached count point maps for 5 speed studies that need to be done. The Kings Cove study is a bit different. Tubes are to be placed where they were placed before (map attached) but they are to remain in place for a week. The study in University Hills - Croydon and Fair Oaks - is speed and volume - checking to see if the Stop sign should be switched so that Fair Oaks stops for Croydon which is opposite of the way we have it now. The other three are for speed. Please get these out as soon as you can. Thanks!
