

## **Company Overview**

American Axle & Manufacturing, Inc. (AAM) -

AAM is the largest independent supplier of driveline components, systems and modules for light trucks, sport utility vehicles and passenger cars manufactured and sold in North America. AAM associates manufacture, engineer, design and validate driveline systems and related components and modules, chassis systems and forged products.

The AAM Technical Center -

With complete design, engineering, testing and validation under one roof, AAM's Technical Center in Rochester Hills, Michigan, represents a world-class investment in our future and the future of our customers. This facility is dedicated to product design and development, competitive analysis, systems integration, and the validation and certification of driveline systems, chassis systems and metal formed products.
