Subject: Canterbury, Walton & Brewster intersection issue

Mr. Bond,

Per your previous e-mail request, this correspondence serves as acknowledgement that your April 9th e-mail was received by the Mayor's office and forwarded to my department for review and response.

I suggest that the City present this issue before the Traffic Safety and Advisory Board and also discuss options with the Road Commission for Oakland County since they own Walton Road. Paul Shumejko, the City's Transportation Engineer, sets the meeting agenda for the Traffic Safety and Advisory Board and he is also the person that handled the previous Adams Road pedestrian bridge problem. I will provide him a copy of your April 9th e-mail file attachment. Thanks for providing your well-worded letter explaining the problem and offering suggestions on the contributing factors. The next regularly scheduled traffic safety and advisory board meeting is May 13th (the meetings are typically held the second Tuesday of each month). We will update you on our progress on the issue and notify you if the study work can be completed and included as an agenda item for the May 13th meeting or if it needs to wait until the June meeting.

Paul M. Davis, P.E.
Rochester Hills City Engineer

Subject: Public Safety Issue

Mayor Barnett,

Attached is a word document outlining a safety issue which I want to call to your offices attention. As in the past, our homeowners association looks for assistance from your office to address the issue.

We appreciate all you are doing for our city.

David Bond
President
Stratford Knolls Homeowners Association
Rochester Hills, Michigan
