RE: Replacement Fuel Mgmt. System

As a result of numerous meetings of our replacement fuel management system RFP evaluation team, a conclusion was reached that it is in the best interest of the city to award purchase to TRAK Engineering of Tallahassee, Florida. The TRAK system is very user friendly, simple to upgrade, requires the least amount of hardware and support from our MIS department of the systems we evaluated, offers excellent warranty (2 year) and unlimited telephone support. The TRAK system easily integrates with our Fleet Management Information System (RTA). The proposer offered the lowest cost and their system meets the desired requirements and needs of the City.
