RE: 46461 Dequindre

A telephone call was received by the Planning Department on November 23, 2009 from a neighbor of the applicant – Shurley White, 46317 Dequindre.

Ms. White was concerned if the chickens were permitted, that the applicant be required to keep them penned. She explained the chickens are often in her front yard and leave droppings on her driveway. She does not want to clean up after them.

She indicated she is two doors to the south of the applicant's property, and explained the chickens come across the property between hers and the applicant's as well. She is aware the applicant owns that property and rents the house on the property.

She said the chickens are often in the ditch that runs along Dequindre, and then wander up on the adjacent properties.

She could not attend the meeting because she does not drive at night, but wanted to be put on the record expressing her concern that if the chickens are permitted, they be penned.
