Hello Leanne,

Thank you for taking my call today. I am hear by attaching request (page#2 of the attached document) from Arcadia Park HoA (APHA) Board for a City Council's approval allowing us to apply to Michigan Department of Natural Resources for permits for Canada Goose Egg / Nest Destruction and Round up if necessary. Our 5 year permit expired last year and we are requesting for another 5 year term to control the Goose population around our ponds which are a nuisance and health risk to residents living around the ponds and a danger to motorists.

I understand the next city Council meeting is on April 13th. Much appreciate if you can help me get on the agenda for April 13th. I have also included previous approval for your reference.

I have contacted the USDA today and they are going to hold my application until April 13th council meeting before providing final approval which is still good as permit lasts from April through May 20th.

Best regards,

Vinay Gowda

APHA Board Member
