

Rochester Hills Museum

at Van Hoosen Farm

- Number of people attending this event: 251
- Revenue generated for the rebuilding of the Equipment Barn: \$32,500
- Amount of time to produce this film: 11 months

The Van Hoosen Farm Equipment Barn

- The Equipment Barn was once an integral part of the Van Hoosen Farm operation.
- Built in 1912, it was torn down in 1999 due to its deterioration.
- The Museum has a full set of photographs and drawings of this facility and would like to rebuild it to:
 - Continue restoring the Van Hoosen Farm facility
 - Create exhibit space for storage of farm equipment that currently sits outside
 - Create storage space for Museum operational equipment such as golf cart, gator, grounds supplies
 - Allow two existing historic buildings that are currently used for storage – The 1911 Milk House and 1927 Bull Barn to be open to the public

Equipment Barn Replacement – PK-03F

Coming in 2018
Equipment Barn Reconstruction
