Subject: Re: Water Rates

Rochester Hills proposed rates for 2010/11 are \$83,118 per month and \$24.06 per Mcf. If Rochester Hills had demand values of 445,000 Mcf volume and 25.81 MGD for maximum day/peak hour, approximately estimated 2010/11 water rates for Rochester Hills would be \$67,562 per month and \$13.96 per Mcf.

If you have any questions regarding this matter please contact my office.

Subject: Water Rates

Raphael,

I am writing to request additional information concerning drinking water purchase rates for Rochester Hills. Much discussion has gone on concerning what rates would have been with storage. Specifically, If Rochester Hills was a max day customer, what would the rates be? I would appreciate any information that you could provide concerning past or future rates that Rochester Hills could have experienced or could expect to experience in the future should we decide to install storage and become a max day customer of DWSD. City Council will be discussing water storage options on Monday May 3 rd and your response will provide some of the necessary information needed to make an informed decision.

Thanks for your continued assistance with this issue.

Sincerely,

Roger Rouse
