Dan,

Bud and I visited the sites this morning. Bud plans to put barricade up today and to have crews performing the repairs by the end of the month. There are a number of catch basins that need repairs and he hopes to get them done all at one time so it may take weeks to complete the entire sub.

Thanks

Roger

Roger,

Look at the email below regarding 2937 and 2955 Waterview Dr.? I forwarded this to you in early June and I believe someone went out and looked at the street and entranceway in question. Has there been any preliminary determination on whether repairs are needed?

Hi Dan,

Just a reminder about our conversation at the RHISE function.  
There are two points of street disrepair at our location. One at each entrance.  
The 2937 building had a big loose chunk of pavement that was sticking straight up. Our UPS driver told us about it and our guys tamped it back in the ground.  
The entrance to our 2955 building should have the sewer drain looked at. It is sinking!

Please keep me posted o the progress.

Thanks for your attention to this matter.
