Typical Evergreen replacement is to be 8 ft in height. Being that this is equivalent to a 2" deciduous tree replacement in the ordinance and keeping with this ratio, for specimen trees, Evergreens that are 12' in height will count towards 3" of replacement of the 50% dbh at this specific location

Tree calculations and adjustments to tree plantings shown

L-1,4,5,6

excess tree replacement from planting larger trees will not be allowed to count for mitigation of tree removal at other development project.
