

April 24, 2009

Rochester Hills City Council,

This letter is to readdress statements I made at the September 2008 council meeting.

I stated that historical designation of the Frank Farm would be a hindrance to family regarding future plans or sale.

As true as I still believe this statement is, I accept Rochester Hill's desire to retain what small part of history the property holds.

While the continuous residing generations is coming to an end, would the city consider: purchase/develop/manage this historical farm property an idea of a working educational land stewardship venture between city and family.

Food for thought and future generations,

Anita G. Holtz
