Leanne: Below is the response I received from John Staran regarding his review of the Metro Act Application from 123.Net, Inc.

Re your second question about 123.net, I have reviewed that application. This application appears to be strictly for underground fiber optic cable and use of existing AT&T conduit. Doesn't include or refer to DAS or small cells or new towers and poles, unlike some of the recent applications we've seen. So, I think 123.net's application is appropriate for processing as a Metro Act permit. So, it should be planned for placement on next council agenda.
