

Crooks Rd & M59 Bridge Reconstruction

Maintaining one or two directions of traffic while constructing the new Crooks Road interchange will require more total cost and time. MDOT has stated that a total closure of the Crooks and M-59 interchange will permit the total construction time frame to be reduced by approximately 3 months. In any scenario, MDOT is proposing to complete the interchange work during the 2011 construction season between March/April to mid-November. Would you prefer that MDOT plan for a total closure of the Crooks interchange to decrease the overall schedule or maintain thru traffic during construction? Please choose one of the following:

Answer Options	Response Percent	Response Count
In favor of total interchange closure	12.9%	8
In favor of maintaining both directions of thru traffic	85.5%	53
Other (please specify)	1.6%	1
<i>answered question</i>		62
