SUBJECT: Historical property: 947 E. Tienken Rd., Rochester Hills, MI 48306

To Whom It May Concern:

I am writing in concern for my historical property at 947 E. Tienken Rd. The original structure needs to be moved back on the property. The addition to the original structure needs to be rebuilt, replicating the original home and to local and state building codes. I would like to keep any original materials in the house and build the new addition, except for the trap on the roof. I would like to do this while honoring the historical value of the home. The expense of bringing this dwelling up to code would be unrecoverable.

I spoke with Bob White in the building department and he stated that the house is impeding the right of way on Tienken Rd., and would need to be moved back on the property. Doing this would make more room to accommodate turning a vehicle in the driveway on an already dangerous road.

You can reach me directly at 248-640-4936 to discuss this further.

Sincerely,

Ralph L. Putman
