Subject: RE: Auburn & Livernois Traffic Signal Timing

Marc -

We have made several tweaks to the timing at this signal in an effort to get more time for Auburn in the afternoon. My engineer has been out there the last few days reviewing the signal, but is not in today to give me status. I'll get with him next week to see what changes have been made.

Danielle,

We had our Advisory Traffic & Safety Boar last night and the board wanted us to report back with with any signal timing improvements for eastbound Auburn Road at Livernois Road. We advised the concerned area residents complaining about cut-through traffic in their subdivision that this would be a first step forward and a short term effect until the intersection capacity was improved. Could you please inform us of any timing adjustments that you may recommend. Thanks.

Marc

Marc -

We are currently looking at the signal now. I should have something for you in the next day or two.

The signal at Auburn & Avondale Middle School operates everyday from 6 am to 8 pm.

Hi Danielle,

I just wanted to follow if you had a chance to do a field review of the signal timing for EB Auburn at Livernois during afternoon peak hour (4:30-5:30PM), to possiblity extend the green phase to assist with through & left turn movements. Per the attached maps we validated cut-through traffic concerns for the Gildewell Subdivsion located at northwest quadrant of the intersection. EB Auburn Road traffic will queued back to 1600' +/- west of Livernois Road and were interested in lessening the effect of Dearborn to Bagley cut-through traffic.

Also, could you advise what the flash schedule is for Avondale Middle School driveway at Auburn Road (Signal I.D.#4214).

Thanks Much!

Marc
