Agenda No: 2003-2115
Date: January 20, 2004
Prepared By: Roger Moore, Professional Surveyor
City File No: Storm Water Detention Pond Inventory Project

Meeting Date: February 4, 2004

PURPOSE:

The Department of Public Services is requesting approval of the Inter-Agency Agreement between the County of Oakland and the City of Rochester Hills to contract for storm water management services.

DISCUSSION:

The County Drain Commissioners Office, on behalf of the Rouge River Main 1 and 2 Sub-Watershed Advisory Group, applied for and was awarded a grant to implement inventory of detention basins and stream bank erosion.

In Rochester Hills the project will be preparing a detention basin inventory that will include developing and populating a database of detention basins within the Rouge Sub-Watershed. Each basin will have a field assessment of the existing condition. They will be evaluated and ranked for needed improvements and maintenance. They will be making recommendations for possible retrofitting measures to improve discharge water quality, basin function and groundwater recharge. A summary of field findings and the accompanying recommendations, including construction cost estimates, will be included in a comprehensive final report.

FISCAL INFORMATION:

There are approximately 60 basins within the Rouge Sub Watershed in Rochester Hills. The project cost for the 60 basins is approximately \$23,000. The grant covers approximately 40% of the cost of the study. The Rochester Hills portion of the cost will be \$14,421. Payment must be made to Oakland County Fiscal Services no later than February 23, 2004.
