ROCHESTER HILLS MICHIGAN

J2024-0393
PSP2024-0039
Revision #2
Received 3/25-2025

City of Rochester Hills Planning & Economic Development

Site Plan Review

Reviewed for compliance with City Ordinance, Building and Fire Codes
Conditions and mark-ups noted throughout plan set must be addressed prior to final approval

Department	Reviewer	Approved
Assessing	Assessing	Yes
Building	Mark Artinian 248-841-2446 ArtinianM@RochesterHills.org	Yes
Engineering - Utilities	Jason Boughton 248-841-2490 BoughtonJ@RochesterHills.org	Yes
Engineering Legal	Seth Bucholz 248-841-2491 bucholzs@rochesterhills.org	YES Date:04/01/2025
Fire	Lt. Walter Murphy 248-841-2712 MurphyW@RochesterHills.org	Yes
Natural Resources	Matt Einheuser 248-841-2551 EinheuserM@RochesterHills.org	Yes
Planning	Chris McLeod 248-841-2572 mcleodc@RochesterHills.org	Yes
Traffic	Keith Depp 248-841-2503 DeppK@RochesterHills.org	Yes

SP — Final wetland size to be determined by survey of wetland delineating markers. If surveyed area totals more than 2 acres, additional reviews may be necessary pursuant to Ordinance.

LB — $6,550 for landscaping, $2,700 for irrigation.

LIP

BP

PCM

TRP — 25 trees ($8,350) to be paid into the City Tree Fund

ADM

Next Steps: Schedule for the next available Planning Commission agenda

ZONING: CITY EC & R-4:
EMPLOYMENT CENTER &
ONE-FAMILY RESIDENTIAL DISTRICT

AREA & WIDTH:

E. NONRESIDENTIAL LOT REQUIREMENTS. THE MINIMUM LOT AREA AND MINIMUM LOT WIDTH SHALL BE DETERMINED BY THE USE MEETING ALL MINIMUM YARD REQUIREMENTS AND ALL OTHER REQUIREMENTS OF THIS ORDINANCE. IN CB DISTRICTS, PARCELS WITH LESS AREA OR WIDTH THAN THE MINIMUM REQUIREMENT MAY BE PERMITTED PROVIDED ALL OF THE FOLLOWING EXIST:

1. THE PARCEL IS ACCESSED THROUGH EXISTING ACCESS POINTS. ADDITIONAL ACCESS POINTS MAY ONLY BE CONSTRUCTED UPON APPROVAL BY THE PLANNING COMMISSION.
2. A COVENANT RESTRICTION PROHIBITING ADDITIONAL INGRESS/EGRESS DRIVES FROM ABUTTING PUBLIC THOROUGHFARES WITHOUT PLANNING COMMISSION APPROVAL, SHALL BE RECORDED AT OAKLAND COUNTY.
3. CROSS ACCESS EASEMENT(S) MUST BE PROVIDED TO NEIGHBORING PARCELS, IF FEASIBLE.
4. ANY PARCEL CREATED AS A RESULT OF THIS ORDINANCE SHALL NOT BE ENTITLED TO A SEPARATE FREESTANDING MONUMENT SIGN.

MAX. HEIGHT:
STORIES: 3 STORIES Q OR 42' Q

Q. INCREASED BUILDING HEIGHT. THE MAXIMUM HEIGHT FOR BUILDINGS IN THE O-1 AND EC DISTRICTS MAY EXCEED THE MAXIMUM NOTED IN SECTION 138-5.100 IN ACCORDANCE WITH THE FOLLOWING REQUIREMENTS:

1. HEIGHT MODIFICATIONS FOR PROJECTS LOCATED ON SITES WITH LESS THAN FIVE ACRES SHALL REQUIRE CONDITIONAL USE APPROVAL IN ACCORDANCE WITH THE PROCEDURES OF ARTICLE 2, CHAPTER 3 (CONDITIONAL USE APPROVAL).
2. HEIGHT MODIFICATIONS FOR PROJECTS LOCATED ON SITES WITH FIVE OR MORE ACRES OF LAND ARE SUBJECT TO PLANNING COMMISSION APPROVAL.
3. FOR THOSE BUILDINGS WITH A PITCHED ROOF, THE MAXIMUM HEIGHT MAY NOT EXCEED 55 FEET AS MEASURED TO THE MID-POINT OF THE ROOF SYSTEM.
4. ANY STRUCTURE IN THE O OR EC DISTRICT ABUTTING LAND PLANNED FOR ONE-FAMILY RESIDENTIAL LAND USES ON THE MASTER LAND USE PLAN FUTURE LAND USE MAP SHALL INCREASE THE REQUIRED YARD ABUTTING THE RESIDENTIAL DISTRICT BY TWO FEET FOR EVERY FOOT IN HEIGHT ABOVE 30 FEET AS MEASURED TO THE TOP OF THE HIGHEST BEAM FOR FLAT ROOF SYSTEMS OR TO THE MID-POINT OF PITCHED ROOFS.

MINIMUM SETBACK:
FRONT SETBACK: 25 FT.
SIDE: 25 FT.O / TOTAL: 50 FT.
REAR: 30 FT

1. APPROVED TREE PROTECTION SHALL BE ERECTED PRIOR TO THE START OF CONSTRUCTION ACTIVITIES, AND SHALL REMAIN IN PLACE UNTIL CONSTRUCTION IS COMPLETE. THE FORESTRY DIVISION SHALL BE NOTIFIED AFTER TREE PROTECTION IS IN PLACE; PROIR TO CONSTRUCTION ACTIVITIES, INCLUDING DELIVERY OF MATERIALS.
2. NO PERSON MAY CONDUCT ANY ACTIVITY WITHIN THE DRIP LINE OF ANY TREE DESIGNATED TO REMAIN; INCLUDING, BUT NOT LIMITED TO, PLACING SOLVENTS, BUILDING MATERIALS, CONSTRUCTION EQUIPMENT, OR SOIL DEPOSITS WITHIN THE DRIP LINE.
3. GRADE CHANGES MAY NOT OCCUR WITHIN THE DRIP LINES OF PROTECTED TREES.
4. DURING CONSTRUCTION, NO PERSON SHALL ATTACH ANY DEVICE OR IRE TO ANY REMAINING TREE.
5. ALL UTILITY SERVICE REQUESTS MUST INCLUDE NOTIFICATION TO THE INSTALLER THAT PROTECTED TREES MUST BE AVOIDED. ALL TRENCHING SHALL OCCUR OUTSIDE OF THE PROECTIVE FENCING.
6. SWALES SHALL BE ROUTED TO AVOID THE AREA WITHIN THE DRIP LINES OF PROTECTED TREES.
7. IF TREE PROTECTION CANNOT BE MAINTAINED FOR A TREE THROUGHTOUT THE CONSTRUCTION PERIOD, REPLACEMENT OF THAT TREE MAY BE REQUIRED PRIOR TO THE ISSUANCE OF THE CERTIFICATE OF OCCUPANCY.
8. REGULATED TREE LOCATED ON ADJACENT PROPERTY THAT MAY BE AFFECTED BY CONSTRUCTION ACTIVITIES MUST BE PROTECTED.

STANDARD TREE PROTECTION
NOT TO SCALE

TREE PRESERVATION REQUIREMENTS

A. NUMBER OF REGULATED TREES (> 6") OUTSIDE OF BUILDING ENVELOPE (SEE SEC. 126–327 (1) A.) FOR DESCRIPTION OF BUILDING ENVELOPES BASED ON LOT AND DEVELOPMENT TYPE (DO NOT COUNT DEAD TREES – EXCEPTIONS) — 157

B. NUMBER OF REGULATED TREES OUTSIDE OF BUILDING ENVELOPE BEING PRESERVED — 125

C. PRESERVATION PERCENTAGE =B / A — 120/157 OR 0.796 79.6%>40 %
MUST BE MIN. OF 40% – SEC.126–324(2)

TREE REPLACEMENT

A. TOTAL NUMBER OF REGULATED TREES BEING REMOVED ON SITE (BOTH INSIDE AND OUTSIDE OF BUILDING ENVELOPE). (DO NOT COUNT DEAD TREES – EXCEPTIONS) — 32 (1 INSIDE, 31 OUTSIDE)

B. NUMBER OF REGULATED "NUISSANCE TREES" BEING REMOVED ON SITE (SEE SEC. 126–397 (4)) **REQUIRES ONE FOR ONE REPLACEMENT** — 0

C. NUMBER OF REGULATED TREES (NONNUISANCE) BEING REMOVED THAT ARE NOT OF SIZE TO BE CONSIDERED "SPECIMEN TREES" ON SITE (SEE SEC. 126–397 A.) REQUIRES ONE FOR ONE REPLACEMENT — 32

D. TOTAL DBH OF "SPECIMENT TREES" BEING REMOVED ON SITE (SEE SEC. 126–397 (3) A.) REQUIRES 50% REPLACEMENT — 0

E. TOTAL NUMBER OF "SPECIMEN TREES" BEING PRESERVED ON SITE (SEE SEC. 126–397 (3)) 2" TREE CREDIT GIVEN FOR EACH SPECIMENT TREE PRESERVED — 7

F. NUMBER OF 2" TREE REPLACEMENTS REQUIRED FOR SPECIMEN TREES =(0.5* D) / 2 — 0

G. TOTAL NUMBER OF 2" TREES REQUIRING REPLACEMENT =(B+C+F) – E — 25 (0+32+0)-7

25 TREES TO BE ACCOUNTED FOR IN TREE FUND
25 TREES * $334=$8,350.00

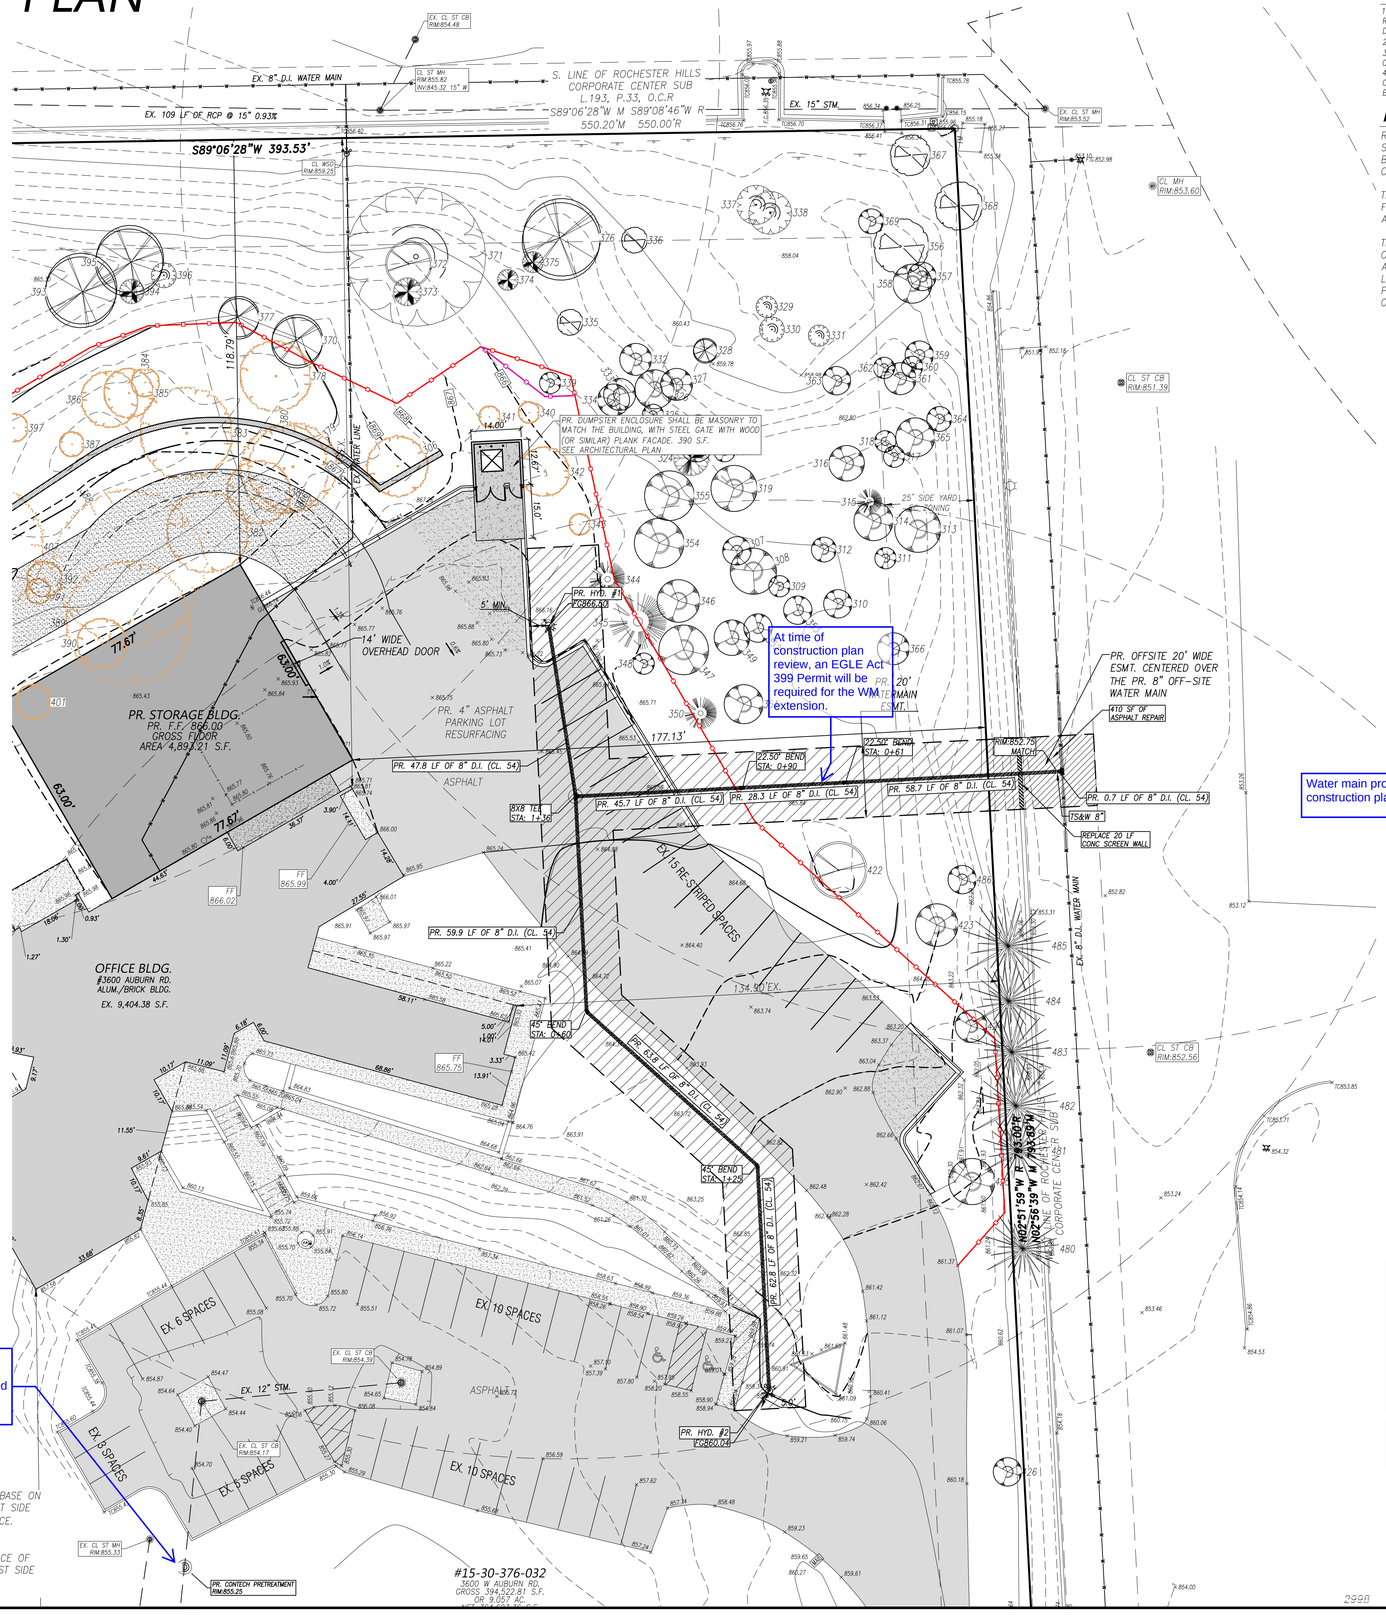
UTILITY PLAN



GENERAL NOTES:

1. ALL WORK SHALL CONFORM TO THE CURRENT REQUIREMENTS OF THE CITY OF ROCHESTER HILLS, OAKLAND COUNTY WATER RESOURCES COMMISSIONER, DEPARTMENT OF EGLE AND ANY OTHER APPLICABLE AUTHORITIES.
2. PROPOSED WATERMAIN TO SERVE TAX ID #15-30-376-032
3. WATERMAIN TO BE WITHIN 20' WIDE UTILITY EASEMENT WHEN OUTSIDE OF RIGHT OF WAY.
4. NO TREES PROPOSED TO BE REMOVED. IF THIS CHANGES CONTRACTOR MUST CONTACT CITY OF ROCHESTER HILLS AND GET APPROVAL OF ANY INDIVIDUAL TREE BEING REMOVED.

NOTES:

REICHERT SURVEYING INC., SHALL NOT BE RESPONSIBLE FOR MEANS, METHODS, PROCEDURES, TECHNIQUES, OR SEQUENCES OF CONSTRUCTION, NOR FOR SAFETY ON THE JOB SITE, NOR SHALL REICHERT SURVEYING INC., BE RESPONSIBLE FOR THE CONTRACTORS FAILURE TO CARRY OUT THE WORK IN ACCORDANCE WITH THE CONTRACT DOCUMENTS.

THE CONTRACTOR SHALL INDEMNIFY AND SAVE HARMLESS, THE OWNER AND SURVEYING FROM ALL LIABILITIES FOR INJURY TO PERSON, OR DAMAGE TO OR LOSS OF PROPERTY, OR ANY OTHER LOSS, COST OF EXPENSE, AS A RESULT OF THE ACTIONS OF THE CONTRACTOR, HIS EMPLOYEES, AGENTS, OR SUBCONTRACTORS.

THE LOCATION AND ELEVATION OF EXISTING UNDERGROUND UTILITIES AS SHOWN ON THESE DRAWINGS ARE ONLY APPROXIMATE. NO GUARANTEE IS EITHER EXPRESSED OR IMPLIED AS TO THE COMPLETENESS OR ACCURACY THEREOF. THE CONTRACTOR SHALL BE EXCLUSIVELY RESPONSIBLE FOR DETERMINING THE EXACT LOCATION AND ELEVATION OF THE EXISTING UTILITIES AND PROPOSED UTILITY CROSSINGS IN THE FIELD PRIOR TO CONSTRUCTION. THE CONTRACTOR SHALL NOTIFY THE ENGINEER IF ANY CONFLICTS ARE APPARENT OR IF THE LOCATION OR DEPTH DIFFERS SIGNIFICANTLY FROM THE PLAN.

ZONING: CITY EC & R-4:
EMPLOYMENT CENTER &
ONE-FAMILY RESIDENTIAL DISTRICT

AREA & WIDTH:
E. NONRESIDENTIAL LOT REQUIREMENTS. THE MINIMUM LOT AREA AND MINIMUM LOT WIDTH SHALL BE DETERMINED BY THE USE MEETING ALL MINIMUM YARD REQUIREMENTS AND ALL OTHER REQUIREMENTS OF THIS ORDINANCE. IN CB DISTRICTS, PARCELS WITH LESS AREA OR WIDTH THAN THE MINIMUM REQUIREMENT MAY BE PERMITTED PROVIDED ALL OF THE FOLLOWING EXIST:
1. THE PARCEL IS ACCESSED THROUGH EXISTING ACCESS POINTS. ADDITIONAL ACCESS POINTS MAY ONLY BE CONSTRUCTED UPON APPROVAL BY THE PLANNING COMMISSION.
2. A COVENANT RESTRICTION PROHIBITING ADDITIONAL INGRESS/EGRESS DRIVES FROM ABUTTING PUBLIC THOROUGHFARES WITHOUT PLANNING COMMISSION APPROVAL, SHALL BE RECORDED AT OAKLAND COUNTY.
3. CROSS ACCESS EASEMENT(S) MUST BE PROVIDED TO NEIGHBORING PARCELS, IF FEASIBLE.
4. ANY PARCEL CREATED AS A RESULT OF THIS ORDINANCE SHALL NOT BE ENTITLED TO A SEPARATE FREESTANDING MONUMENT SIGN.

MAX. HEIGHT:
STORIES: 3 STORIES ^{O} OR 42' ^{O}

Q. INCREASED BUILDING HEIGHT. THE MAXIMUM HEIGHT FOR BUILDINGS IN THE O-1 AND EC DISTRICTS MAY EXCEED THE MAXIMUM NOTED IN SECTION 138-5.100 IN ACCORDANCE WITH THE FOLLOWING REQUIREMENTS:
1. HEIGHT MODIFICATIONS FOR PROJECTS LOCATED ON SITES WITH LESS THAN FIVE ACRES SHALL REQUIRE CONDITIONAL USE APPROVAL IN ACCORDANCE WITH THE PROCEDURES OF ARTICLE 2, CHAPTER 3 (CONDITIONAL USE APPROVAL).
2. HEIGHT MODIFICATIONS FOR PROJECTS LOCATED ON SITES WITH FIVE OR MORE ACRES OF LAND ARE SUBJECT TO PLANNING COMMISSION APPROVAL.
3. FOR THOSE BUILDINGS WITH A PITCHED ROOF, THE MAXIMUM HEIGHT MAY NOT EXCEED 55 FEET AS MEASURED TO THE MID-POINT OF THE ROOF SYSTEM.
4. ANY STRUCTURE IN THE O OR EC DISTRICT ABUTTING LAND PLANNED FOR ONE-FAMILY RESIDENTIAL LAND USES ON THE MASTER LAND USE PLAN FUTURE LAND USE MAP SHALL INCREASE THE REQUIRED YARD ABUTTING THE RESIDENTIAL DISTRICT BY TWO FEET FOR EVERY FOOT IN HEIGHT ABOVE 30 FEET AS MEASURED TO THE TOP OF THE HIGHEST BEAM FOR FLAT ROOF SYSTEMS OR TO THE MID-POINT OF PITCHED ROOFS.

MINIMUM SETBACK:

FRONT SETBACK:	25 FT.

Economic Development
City of Rochester Hills
1000 Rochester Hills Drive
Rochester Hills, MI 48309-3033

Subject: **3600 Auburn Road Development**
3600 Auburn Road (Sidwell No. 15-30-376-032)
Site Plan Review #1
Site Plans dated March 25, 2025
ASTI File No. A25-1482.08

Applicant: **Auburn Road 3600 LLC**

Dear Mr. McLeod:

The above-referenced project proposes to construct and addition to an existing commercial building, a drive extension near the proposed building, and resurface a portion of an existing parking lot on approximately nine acres of land located at 3600 Auburn Road. The site includes one wetland not regulated by the City of Rochester Hills and also not likely regulated by the Michigan Department of Environment, Great Lakes, and Energy (EGLE).

ASTI has reviewed the site plans, dated March 25, 2025 (Current Plans), for conformance to the Wetland and Watercourse Protection Ordinance and the Natural Features Setback Ordinance and offers the following comments for your consideration.

COMMENTS

1. **Applicability of Chapter (§126-500).** The Wetland and Watercourse Protection Ordinance is applicable to the subject site because the subject site is not included within a site plan which has received final approval, or a preliminary subdivision plat which received approval prior to January 17, 1990, which approval remains in effect and in good standing, and the proposed activity has not been previously authorized.

2. **Wetland and Watercourse Determinations (§126-531).** This Section lists specific requirements for completion of a Wetland and Watercourse Boundary Determination.

    a. This review has been undertaken in the context of a Wetland and Watercourse Boundary Determination completed on-site by ASTI on March 6, 2025. All flagging is shown on the Current Plans with alpha-numeric flagging as placed in the field by ASTI. *The Current Plans do not indicate that ASTI completed the delineation or what date it was completed; this must be shown on revised plans. Revised plans should also show the total wetland area including the open water portion of the wetland (1.5 aces) on all applicable sheets.*

    The Applicant should be advised that wetland delineations are only considered valid by the City and EGLE for a period of three years.

    b. One wetland was found on-site as shown on the Current Plans (Wetland A). Wetland A's quality assessments is below.

    Wetland A
    Wetland A is a forested and emergent/open water wetland. Vegetation within the forested portion of Wetland A was dominated by the common native tree species of box elder, cottonwood, and green ash; the shrub layer was dominated by the non-native species of glossy buckthorn. The herbaceous understory was generally very sparse at the time of the inspection and was dominated by the common native species of eastern wood sedge (*Carex blanda*) and calico aster (*Symphyotrichum lateriflorum*) and the non-native species of garlic mustard (*Allaria petiolata*), generally in equal distribution. The tree layer of the forested portion of Wetland A was dominated by common native species; the shrub layer was dominated by non-native species and the herbaceous layer was generally equal in distribution of non-native and native species. Overall, Wetland A was dominated by native wetland species estimated at 65%.

Primary wetland hydrology indicators, such as surface water, a high-water table, soil saturation, and oxidized rhizospheres on living roots were observed throughout Wetland A. Soils within Wetland A were comprised of sandy loams and appeared to be in a natural state. Along with observations of surface water, these hydrological indicators show Wetland A is likely in contact with groundwater to some depth.

Wetland A is isolated and does not extend off-site. Review of historic aerial photography dating to the 1940s indicates Wetland A has been persistent for decades and may be a groundwater recharge wetland. However, Wetland A is very small (1.5 total acres) and, thus, does not likely provide significant wildlife habitat, water filtration (except site-specific), flood protection, or other recognized wetland functions. Based on these factors, it is ASTI's opinion that Wetland A of low ecological quality and function.

3. **Use Permit Required (§126-561).** This Section establishes general parameters for activity requiring permits, as well as limitations on nonconforming activity. This review of the Current Plans has been undertaken in the context of those general parameters, as well as the specific requirements listed below.

   a. Wetland A is not regulated by the City and likely not regulated by EGLE, because it is isolated and less than two acres in size. The applicant is advised to obtain EGLE concurrence regarding EGLE-regulation prior to impacting Wetland A.

4. **Use Permit Approval Criteria (§126-565).** This Section lists criteria that shall govern the approval or denial of an application for a Wetland and Watercourse Use Permit. The following items must be addressed on a revised and dated Wetland and Watercourse Use Permit application and additional documentation submitted for further review:

   a. A Wetland and Watercourse Use Permit from the City is not required for this project as proposed on the Current Plans. It is also not likely that a Part 303/301 permit from EGLE will also be required. However, EGLE should be contacted to confirm this assertion. Any applicable permits from EGLE and any other applicable agencies must be obtained by the applicant prior to construction activities.

5. **Natural Features Setback (§21.23).** This Section establishes the general requirements for Natural Features Setbacks and the review criteria for setback reductions and modifications.

    a. All Natural Features Setbacks are shown on the plans to ASTI's satisfaction. The on-site natural features Setbacks were generally of the same low quality ecological character as Wetland A and should be considered to be of low quality and function. Moreover, Wetland A is not regulated by the City and, thus, the Natural Features Setbacks regulations per applicable City ordinances are not applicable to this project as proposed.

RECOMMENDATION

ASTI recommends the City approve the Current Plans on the condition that the items in Comment 2.a are addressed on final plans.

Respectfully submitted,

ASTI ENVIRONMENTAL

Chris McLeod, Planning Manager
Department of Planning and
Economic Development
City of Rochester Hills
1000 Rochester Hills Drive
Rochester Hills, MI 48309-3033

Subject: **Wetland and Watercourse Boundary Determination**
3600 Auburn Road (Sidwell No. 15-30-376-032)
City of Rochester Hills, Oakland County, Michigan
ASTI File No. A25-1482.06

Applicant: **3600 Auburn Road LLC**

Dear Mr. McLeod:

The City of Rochester Hills requested that a Wetland and Watercourse Boundary Determination be completed for the property at 3600 Auburn Road (Sidwell No. 15-30-376-032) located within the City of Rochester Hills, Oakland County, Michigan (Property).

ASTI Environmental (ASTI) completed a Wetland and Watercourse Boundary Determination in accordance with the City of Rochester Hills Wetland and Watercourse Protection Ordinance for the Property on March 6, 2025. One wetland not regulated by the City of Rochester Hills and not likely regulated by the Michigan Department of Environment, Great Lakes, and Energy (EGLE) was observed on the Property (Figure 1 – *Approximate Wetland Boundaries*). ASTI offers the following comments for your consideration.

COMMENTS

1. Wetland and Watercourse Determinations (§ 126-531). This Section lists specific requirements for completion of a Wetland and Watercourse Boundary Determination.

This Determination has been completed in the context of those requirements.

2. Data Used (§ 126-532). This Section lists sources available for use in investigating or determining location, boundaries, and features of watercourses and wetlands.

The United States Geological Survey (USGS) Rochester, Michigan 7.5' Quadrangle Maps, the USDA Web Soil Survey (WSS), the National Wetland Inventory Map (NWI), the EGLE Wetlands Map Viewer website, and digital aerial photographs were all used to support the wetland determination and subsequent regulatory status of ASTI's determination. All reviewed data indicated the presence of wetland in the southern portion of the Property.

The WSS indicates the Property is comprised of the soil complexes of Fox sandy loam (till plain, 2-6% slopes), Thetford loamy fine sand (0-3% slopes), Urban land-Marlette complex (0-8% slopes), and Urban land-Spinks complex (0-8% slopes). According to the WSS, none of these soil complexes are hydric soils.

3. Additional Investigation (§ 126-533). This Section stipulates that the City may request information or documentation as necessary to facilitate determination of watercourse or wetland boundaries in relation to proposed activity.

See Section 4 below.

4. Criteria and Evidence (§ 126-534). This Section lists criteria that shall govern the determination of wetland and watercourse boundaries. A discussion of these criteria, as they apply to the Property, can be found below:

ASTI investigated the Property for the presence of lakes, ponds, wetlands, and watercourses. This work is based on MCL 324 Part 301, Inland Lakes and Streams, Part 303, Wetlands Protection, and the City of Rochester Hills Wetland and Watercourse Protection Ordinance.

The delineation protocol used by ASTI for this delineation is based on the US Army Corps of Engineers' *Wetland Delineation Manual,* 1987, the *Regional Supplement to the Corps of Engineer Wetland Delineation Manual: Midwest Region*, and related guidance/documents, as appropriate. Wetland vegetation, hydrology, and soils were used to locate wetland boundaries.

One wetland was found on the Property as discussed below.

Wetland A
Wetland A is a forested and emergent/open water wetland approximately 1.8 acres in size located in the south-central portion of the Property (Figure 1). Vegetation within the forested portion of Wetland A was dominated by box elder (*Acer negundo),* green ash

(*Fraxinus pennsylvanica*), cottonwood (*Populus deltoides*), and glossy buckthorn (*Frangula alnus*); the remaining portion of Wetland A was comprised of open water (~0.6 acres). Soils within Wetland A were comprised of sandy loams and are considered hydric because criteria for depleted matrix were met. Indicators of wetland hydrology observed within Wetland A included saturated soils, surface water, water-stained leaves, and oxidized rhizospheres on living roots.

Dominant vegetation observed within the upland adjacent to Wetland A included glossy buckthorn, box elder, black cherry (*Prunus serotina*), and honeysuckle (*Lonicera maackii*). Upland soils were comprised of sand loams and loamy sands that did not meet hydric soil criteria. No indicators of wetland hydrology were observed.

It is ASTI's opinion that Wetland A is not regulated by the City under the City's Wetland and Watercourse Protection Ordinance and not likely regulated by EGLE under Part 303 because it is less than two acres in size and is not connected to, or within 500 feet of, an inland lake or stream as defined under Part 301 and Article IV.

Please note that the acreage of Wetland A as detailed in this report and Figure 1 is approximate and that the exact acreage of Wetland A will be determined through a professional survey to be completed by the applicant of the on-site flagging as placed by ASTI in the field. ASTI will review the City-regulatory status of Wetland A based on this survey through review of site plans for the Property as provided to the City by the applicant.

On-site Flagging
Wetland boundaries were marked in the field with pink and black striped flagging and numbered as follows:

Wetland A = A-1 through A-35

Please note all wetland flagging should be located in the field by a professional surveyor to determine the exact on-site acreage of Wetland A.

Wetland and Watercourse Quality Assessments

Wetland A
Wetland A is a forested and emergent/open water wetland. Vegetation within the forested portion of Wetland A was dominated by the common native tree species of box elder, cottonwood, and green ash; the shrub layer was dominated by the non-native species of glossy buckthorn. The herbaceous understory was generally very sparse at the time of the inspection and was dominated by the common native species of eastern wood sedge (*Carex blanda*) and calico aster (*Symphyotrichum lateriflorum*) and the non-native species of garlic mustard (*Allaria petiolata*), generally in equal distribution. The tree layer of the forested portion of Wetland A was dominated by common native species; the shrub layer was dominated by non-native species and the herbaceous layer was generally equal in distribution of non-native and native species. Overall, Wetland A was dominated by native wetland species estimated at 60% with significant non-native species inclusions (40%).

Primary wetland hydrology indicators, such as surface water, a high-water table, soil saturation, and oxidized rhizospheres on living roots were observed throughout Wetland A. Soils within Wetland A were comprised of sandy loams and appeared to be in a natural state. Along with observations of surface water, these hydrological indicators show Wetland A is likely in contact with groundwater to some depth.

Wetland A is isolated and does not extend off-site. Review of historic aerial photography dating to the 1940s indicates Wetland A has been persistent for decades and may be a groundwater recharge wetland. However, Wetland A is very small (~1.8 acres) and, thus, does not have the capability of providing significant wildlife habitat, water filtration (except site-specific), flood protection, or other recognized wetland functions. Based on these factors, it is ASTI's opinion that Wetland A is of low ecological quality and function.

SUMMARY

Based upon the data, information, criteria, and evidence noted above, ASTI finds that the Property contains one wetland (Wetland A) that is not regulated by the City under the City's Natural Resource Ordinance, Article IV, Wetland and Watercourse Protection, and not likely to be regulated by EGLE under Part 303, Wetland Protection. Any impacts Wetland A will not require a Wetland Use Permit from the City. However, please note that EGLE has the final authority on the extent of regulated wetlands, lakes, and streams in the State of Michigan. Any proposed impact to the areas that ASTI has identified as unregulated by EGLE should be verified with EGLE prior to any proposed impacts.

___ 4 - Morphological Adaptations[1] (Provide supporting data in Remarks or on a separate sheet)
___ Problematic Hydrophytic Vegetation[1] (Explain)

[1]Indicators of hydric soil and wetland hydrology must be present, unless disturbed or problematic.

Hydrophytic Vegetation Present? Yes X No ____

Remarks: (Include photo numbers here or on a separate sheet.)

SOIL

Sampling Point: WT1

Profile Description: (Describe to the depth needed to document the indicator or confirm the absence of indicators.)

Depth	Matrix		Redox Features					
(inches)	Color (moist)	%	Color (moist)	%	Type[1]	Loc[2]	Texture	Remarks
0-18	10YR 4/1	80	10YR 4/6	20	C	PL/M	Loamy/Clayey	Prominent redox concentrations

[1]Type: C=Concentration, D=Depletion, RM=Reduced Matrix, MS=Masked Sand Grains.

[2]Location: PL=Pore Lining, M=Matrix.

Hydric Soil Indicators:

- ___ Histosol (A1)
- ___ Histic Epipedon (A2)
- ___ Black Histic (A3)
- ___ Hydrogen Sulfide (A4)
- ___ Stratified Layers (A5)
- ___ 2 cm Muck (A10)
- ___ Depleted Below Dark Surface (A11)
- ___ Thick Dark Surface (A12)
- ___ Iron Monosulfide (A18)
- ___ Sandy Mucky Mineral (S1)
- ___ 5 cm Mucky Peat or Peat (S3)
- ___ Sandy Gleyed Matrix (S4)
- ___ Sandy Redox (S5)
- ___ Stripped Matrix (S6)
- ___ Dark Surface (S7)
- ___ Loamy Mucky Mineral (F1)
- ___ Loamy Gleyed Matrix (F2)
- X Depleted Matrix (F3)
- ___ Redox Dark Surface (F6)
- ___ Depleted Dark Surface (F7)
- ___ Redox Depressions (F8)

Indicators for Problematic Hydric Soils[3]:

- ___ Iron-Manganese Masses (F12)
- ___ Red Parent Material (F21)
- ___ Very Shallow Dark Surface (F22)
- ___ Other (Explain in Remarks)

[3]Indicators of hydrophytic vegetation and wetland hydrology must be present, unless disturbed or problematic.

Restrictive Layer (if observed):

Type: none

Depth (inches): ___

Hydric Soil Present? Yes X No ___

Remarks:

HYDROLOGY

Wetland Hydrology Indicators:

Primary Indicators (minimum of one is required; check all that apply)

- X Surface Water (A1)
- X High Water Table (A2)
- X Saturation (A3)
- ___ Water Marks (B1)
- ___ Sediment Deposits (B2)
- ___ Drift Deposits (B3)
- ___ Algal Mat or Crust (B4)
- ___ Iron Deposits (B5)
- ___ Inundation Visible on Aerial Imagery (B7)
- ___ Sparsely Vegetated Concave Surface (B8)
- x Water-Stained Leaves (B9)
- ___ Aquatic Fauna (B13)
- ___ True Aquatic Plants (B14)
- ___ Hydrogen Sulfide Odor (C1)
- x Oxidized Rhizospheres on Living Roots (C3)
- ___ Presence of Reduced Iron (C4)
- ___ Recent Iron Reduction in Tilled Soils (C6)
- ___ Thin Muck Surface (C7)
- ___ Gauge or Well Data (D9)
- ___ Other (Explain in Remarks)

Secondary Indicators (minimum of two required)

- ___ Surface Soil Cracks (B6)
- ___ Drainage Patterns (B10)
- ___ Dry-Season Water Table (C2)
- ___ Crayfish Burrows (C8)
- ___ Saturation Visible on Aerial Imagery (C9)
- ___ Stunted or Stressed Plants (D1)
- x Geomorphic Position (D2)
- X FAC-Neutral Test (D5)

Field Observations:

Surface Water Present?	Yes x	No ___	Depth (inches): 0.1
Water Table Present?	Yes x	No ___	Depth (inches): 12
Saturation Present? (includes capillary fringe)	Yes x	No ___	Depth (inches): 3

Wetland Hydrology Present? Yes X No ___

Describe Recorded Data (stream gauge, monitoring well, aerial photos, previous inspections), if available:

Remarks:

WRC
WATER RESOURCES COMMISSIONER
Jim Nash

December 11, 2024

Jennifer MacDonald
City of Rochester Hills
1000 Rochester Hills Drive
Rochester Hills, MI 48309

Reference: **Auburn Road 3600, LLC - CAMS #202400797**
Part of the SW ¼ of Section 30, City of Rochester Hills

Dear Ms. MacDonald,

This office has received a set of plans for the Auburn Road 3600, LLC Project to be developed in part of the Southwest ¼ of Section 30, City of Rochester Hills.

Our stormwater system review indicates that the proposed project may have an involvement with the Chester Drain, which is a legally established County Drain under the jurisdiction of this office. Therefore, a storm drain permit may be required from this office. Please submit a set of plans through our online permitting portal at https://www.oakgov.com/government/water-resources-commissioner/stormwater/drain-use-permit-applications.

The water system is operated and maintained by the City of Rochester Hills and plans must be submitted to the City of Rochester Hills for review.

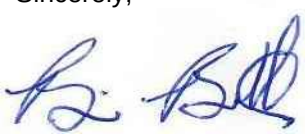
The sanitary sewer is within the Clinton Oakland Sewage Disposal System. Any proposed sewers of 8" or larger may require a permit through this office.

Any related earth disruption must conform to applicable requirements of Part 91, Soil Erosion and Sedimentation Control of the Natural Resource and Environmental Protection Act, Act 451 of the Public Acts of 1994. Applications should be submitted to our office for the required soil erosion permit.

Please note that all applicable permits and approvals from federal, state or local authorities, public utilities and private property owners must be obtained.

If there are any questions regarding this matter, please contact Dan Butkus at 248-897-2744.

Sincerely,



Brian Bennett, P.E.
Assistant Chief Engineer

A 2 hour fire-resistant separation is required between occupancies per Section 508.3.1.
The fire area of the first floor of the building exceeds the allowable for a S-1 occupancy per Section 903.2.1, item #1, therefore the building shall be sprinklered or the mixed occupancies shall be separated.
If a fire-resistant separation is selected, Table 508.4 indicates no separation requirement between a B and S-1 occupancy. However, there is a 2 hour fire separation required between a B and a less hazardous S-2 occupancy. This Plans Examiner feels this is an inaccuracy in the building code that creates an unsafe conditions for the occupants and the more restrictive separation will be required.
