Description of Proposed Project and Use(s) Remove and replace existing windows in existing openings. No changes to window size, configuration or exterior appearance. No structural modifications or alterations are proposed. Replacement vinyl windows will match the existing openings. Window specifications and product information are attached for review.			
History of site, structure(s), and building(s) The window project involves the main 3 story residential home on property. The existing windows are a combination of wood, vinyl and aluminum and were in place prior to current property purchases in 2003. Many of the existing windows have deterioration due to age and exposure. The wood components have rotted and the windows no longer provide an adequate weather seal, allowing air and moisture infiltration that may contribute to further deterioration of the home.
